UAC 2022 Legislative Management Conference

Greg Bunce
GIS Data Coordinator and GIS Manager at UGRC

Who are we?

The State of Utah's Map Technology Coordination Office (GIS)

1970s - Utah was discussing the idea of statewide geographic data

1980 - ESRI was hired as a consultant to assist

1984 - Automated Geographic Reference (AGR) established

1989 - Name change to AGRC (added "Center")

1991 - The SGID was created

2021 - Name change to UGRC

What do we do?

- **…all things geospatial**
  - Geospatial Data (aerial imagery, LiDAR, basemaps, 400 + map layers)
  - Mapping
  - Applications
  - Web services (APIs)
  - GPS Reference Network
- Facilitate the use of geospatial technology in the state
- Coordinate with federal, state, and local partners
  - Aggregate data (statewide datasets)

See this Story Map for a general overview of what we do

How can you get access?

gis.utah.gov

- Data
- Aerial Imagery and Elevation Data
- API
- GPS Network

opendata.gis.utah.gov

atlas.utah.gov

# Where do we get the data?

- **Local Government (counties, cities/towns, tribal lands)**
  - roads, address points, parcels, voting precincts, etc.
- **State agencies/offices**
  - SITLA, Tax Commission, UDOT, Lieutenant Governor's office
- **Federal partners**
  - BLM, USGS, USDA (USFS, NRCS), etc.
- **In-House (UGRC)**
  - municipalities, fire districts, psap, ems, open places, GSL shoreline, etc.

Who uses our data and services?

Who uses our data and services?

What can you do?

- Continue to maintain and provide authoritative data
  - Downloads on website, ftp site, access to db, a portal where you push
- Review data feedback
  - NG911, Voting
    - Address range overlaps, street type inconsistencies, duplicate address points
- Preliminary plat data (proposed and/or under construction)
  - Currently pdfs, geospatial data would be ideal

The Future
NEXT EXIT →

- Shared editing environment
  - Road centerlines (we host or you push)
